## Alternative Access Standards Tables

The tables in this appendix present key reporting elements defined in WIC section 14197.05 regarding alternative access standards requests for provider networks. Please see the *Medi-Cal Managed Care External Quality Review Technical Report, July 1, 2018–June 30, 2019*, for a summary of results.

Table 1 shows the number of alternative access standards requests in an MCPs' service area (County and ZIP Code) for time and distance, and the final disposition of requests by service area and provider type (Provider Type and Adult/Pediatric/N/A). There were 62,731 requests submitted to DHCS, and 17,434 distinct combinations of characteristics appeared in the request and decision data supplied by DHCS. The analysis is based on alternative access standards requests submitted to DHCS between March 1, 2018, and January 31, 2019.

Note the following regarding Table 1:

- ◆ Requests for alternative access standards with missing or invalid ZIP Codes were excluded. All other requests submitted by MCPs were counted, including resubmissions for a given service area and type of provider.
- ◆ Provider type is reported as “NR” (not reportable) if the MCP request does not include a valid provider type.
- ◆ Adult/Pediatric type of provider is reported as “N/A” for Hospital, Mental Health (non-psychiatry) Outpatient Services, OB/GYN PCP, and Pharmacy providers, and may be reported as N/A for OB/GYN specialists.
- ◆ Requests approved by DHCS are reported as “Approved”; requests that are denied, partially denied, or deemed no longer necessary by DHCS are reported as “Denied.”
- ◆ If the Final Disposition of a request is “No decision,” DHCS had not reported a decision by January 31, 2019. A “No Decision” may also be due to the ZIP code being a Post Office Box or a Unique ZIP code in which an AAS was not necessary. Regardless of whether the final disposition is “No decision,” all MCPs received their overall results for all AAS requests by the end of the corrective action period.
- ◆ S = Since the number of requests is less than 11, HSAG suppresses displaying the number in this report to satisfy the Health Insurance Portability and Accountability Act of 1996 (HIPAA) Privacy Rule's de-identification standard.

Table 2 shows the distance and drive time between the nearest network provider and ZIP Code of the beneficiary furthest from that provider in alternative access standards requests submitted to DHCS, and the approximate number of beneficiaries impacted. Minimum, maximum, and median values are presented by MCP and ZIP Code for distance, drive time, and number of beneficiaries impacted. The analysis is based on alternative access standards requests submitted to DHCS between March 1, 2018, and January 31, 2019.

Note the following regarding Table 2:

- ◆ Calculations in this table are based on all submitted requests for alternative access standards except those with missing or invalid ZIP Codes.

- ◆ Not all requests were approved, and DHCS approvals may have included distance or travel time standards differing from the submitted requests.
- ◆ “No data” messages indicate that no information was submitted by the MCP for distance, travel time, or number of beneficiaries impacted in alternative access standards requests for the specified ZIP Code.
- ◆ S = Since the median number of beneficiaries impacted or minimum number of beneficiaries impacted is less than 11, HSAG suppresses displaying the numbers in this report to satisfy the HIPAA Privacy Rule’s de-identification standard.

Table 3A presents the number of alternative access standards requests submitted and the maximum number of days between the initial submission of an alternative access standards request and the delivery of a final approval or denial by DHCS for each MCP that submitted alternative access standards requests during initial review between March 1, 2018, and June 30, 2018.

In accordance with WIC section 14197(e)(3), DHCS must approve or deny an alternative access standards request within 90 days of submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny the alternative access standards request within 30 days of submission of the additional information.

Note the following regarding Table 3A:

- ◆ Requests for alternative access standards with missing or invalid ZIP Codes were excluded.
- ◆ Maximum days were calculated only using initial requests where a decision was rendered before January 31, 2019.
- ◆ The number of days is the difference between the date an alternative access standards request was first submitted by the MCP for a specific service area and type of provider and the date of the most recent decision delivered by DHCS.
