

CalAIM Community Supports Webinar Asthma Remediation and Environmental Accessibility Adaptations (Home Modifications)

Agenda

- » Welcome and Introductions
- » Review of Asthma Remediation and Promising Practices
- » Review of Environmental Accessibility and Home Modifications and Promising Practices
- » Q&A

CalAIM and Community Supports

CalAIM Community Supports are **optional services** that health plans can opt to provide in lieu of higher-cost services traditionally covered by Medicaid.

CalAIM includes **14** Community Supports.

MCPs selected Community Supports to offer when CalAIM went-live on January 1, 2022 and have the **option to add new Community Supports every six months.**

In Lieu of Services (ILOS) Authority 101

What Are “In-Lieu-Of” Services”?

ILOS are **medically appropriate** and **cost-effective services or settings** offered by a managed care plan as a **substitute** for a Medicaid state plan-covered service or setting.

States to date have covered various targeted ILOS. California’s recent approval, however, establishes that ILOS authority can be used to offer a **comprehensive menu** of health-related services in Medicaid.

*Example: Offering **home asthma remediation** in lieu of **future emergency department visits**.*

Regulatory requirements: ILOS are authorized through federal regulation¹⁾ which specifies that services must be:

- Medically appropriate and cost-effective substitutes for a covered service or setting under the Medicaid State Plan
- Authorized and identified in the plan contract
- Offered at plan and enrollee option

The regulation also specifies that the cost of ILOS is taken into account in rate setting.

1) 42 CFR §438.3(e)(2)

What are Community Supports?

Pre-Approved DHCS Community Supports

1. Housing Transition Navigation Services
2. Housing Deposits
3. Housing Tenancy and Sustaining Services
4. Short-Term Post-Hospitalization Housing
5. Recuperative Care (Medical Respite)
6. Respite Services
7. Day Habilitation Programs
8. Nursing Facility Transition/Diversion to Assisted Living Facilities
9. Community Transition Services/Nursing Facility Transition to a Home
10. Personal Care and Homemaker Services
- 11. Environmental Accessibility Adaptations (Home Modifications)**
12. Meals/Medically-Tailored Meals or Medically-Supportive Foods
13. Sobering Centers
- 14. Asthma Remediation**

Asthma Remediation ***Guidance Summary***

A decorative graphic consisting of several overlapping, wavy, horizontal bands in various shades of purple, extending across the width of the slide below the title.

What is Asthma Remediation?

Physical modifications to a home environment to ensure the health, welfare, and safety of the individual

Enables the individual to function in their home

Prevents acute asthma episodes that could result in the need for emergency services and hospitalization

Common Environmental Triggers¹

Mold

Dust

**Rodents
and pests**

Pets

**Wood and
tobacco
smoke**

**Chemical
irritants**

**Gas stoves
and space
heaters**

Examples of Asthma Remediation Services

Allergen- impermeable mattress and pillow dust covers	High-efficiency particulate air (HEPA) filtered vacuums	Integrated Pest Management (IPM) services
De-humidifiers	Air filters	Other moisture- controlling interventions
Minor mold removal and remediation services	Ventilation improvements	Asthma-friendly cleaning products and supplies

Eligible Populations

- » Individuals with poorly controlled asthma as defined by:
 - » Emergency department visit or hospitalization,
 - » Two sick or urgent care visits in the past 12 months,
 - » Or a score of 19 or lower on the Asthma Control Test
- » Licensed health care provider has documented that the service will likely avoid asthma-related hospitalizations, emergency department visits, or other high-cost services

Service Limitations and Restrictions

- » **Restricted or limited if another State Plan service is available** and would accomplish the same goals of preventing asthma emergencies or hospitalizations.
- » Remediations must adhere to applicable State and local building codes.
- » **Lifetime maximum of \$7,500.**
- » Modifications are **limited to those that are of direct medical or remedial benefit** to the Member.
- » Remediations may include finishing to return the home to a habitable condition, but do not include aesthetic embellishments.
- » Plans must provide the owner and Member with written documentation that the **modifications are permanent** and that **the State is not responsible for maintenance, repair, or removal of any modification.**

Who Can Provide Asthma Remediation Services?

Lung health organizations

Healthy housing organizations

Local Health Departments

Community-based providers and organizations

Asthma Remediation Promising Practices

A decorative graphic consisting of several overlapping, wavy, horizontal bands in various shades of purple, extending across the width of the slide below the title.

Anne Kelsey Lamb, Director, Regional Asthma Management and Prevention (RAMP)
Joel Ervice, Associate Director, Regional Asthma Management and Prevention (RAMP)

Asthma Remediation Services: The Value, Best Practices, and Partnerships

Community Supports Webinar Series

July 20, 2022

Regional Asthma Management & Prevention

Anne Kelsey Lamb, MPH, Director

Joel Ervice, Associate Director

RAMP's mission is to reduce the burden of asthma with a focus on health equity. Emphasizing both prevention and management, we build capacity, create linkages, and mobilize networks to advocate for policy and systems changes targeting the root causes of asthma disparities.

Why is Asthma Remediation an exciting opportunity for Medi-Cal members?

       about **1 in 7**

Working together to reduce the burden of asthma

Asthma Remediation: An evidence-based intervention

Asthma Remediation: An evidence-based intervention

Select outcomes

- 56% reduction in asthma symptom days⁸
- 23 to 65% increase in well-controlled asthma^{8,9}
- 36% decrease in wheezing and 43% decrease in rhinitis among adults¹⁰
- Proportion of children with asthma-related ED visits decreased by 42% and urgent care visits decreased by 37%⁸
- 71% reduction in inpatient hospitalizations⁹
- Significant reduction in ED utilization and 69% reduction in ED costs⁸
- 1.34 ROI for patients with two or more past-year ED visits⁸

The benefits of Asthma Remediation for managed care plans

- Improved health outcomes
- Lower care costs
- Increase care quality

Working together to reduce the burden of asthma

Best practices in successful service delivery

When crafting a program and selecting partners, MCPs should emphasize:

- Community health worker/health educator model
- Participant-centered service delivery
- Culturally responsive curriculum

RAMP's support for Asthma Remediation

- We can support new partnerships
 - Facilitate connections with existing local programs
 - Provide technical assistance to both AR providers and MCPs

RAMP's support for Asthma Remediation

- Where local programs are not available, we can:
 - Share best practices on asthma remediation services
 - Provide sample implementation manuals
 - Give strategic guidance

Please reach out!

- Joel Ervice, joel@rampasthma.org

Environmental Accessibility and Home Modifications *Guidance Summary*

A decorative graphic consisting of several overlapping, wavy, horizontal bands in various shades of purple, extending across the width of the page below the title.

What are Environmental Accessibility Adaptations and Home Modifications?

- » Physical adaptations to a home
- » Promote health, welfare, safety, and independence
- » Modifications that help keep members at home and out of long-term care settings

Environmental Accessibility and Home Modification Service Offerings

- » Ramps and grab-bars to ensure access at home
- » Doorway widening for Members who require a wheelchair
- » Stair lifts
- » Making bathrooms and showers wheelchair accessible
- » Installation of specialized electric and plumbing systems to accommodate medical equipment and supplies
- » Installation and testing of a Personal Emergency Response System (PERS)

Eligibility and Authorizations

For individuals at risk for institutionalization in a nursing facility

Documented provider order for service or equipment

Documented provider description of medical necessity for services and efficacy of equipment for member

Authorization Requirements

- » Physical or occupational therapy evaluation and report
 - » Member evaluation and equipment needs
 - » Evaluation of provider-ordered services or equipment
 - » Description of similar equipment used that has demonstrated to be inadequate for the Member
- » Two itemized bids from service providers
- » Suitability of service or equipment verified via home visit

Service Limitations and Restrictions

- **Restricted or limited if another State Plan service is available** and would accomplish the same goals of independence and avoiding institutional placement, that service should be used
- EAAs must be conducted in accordance with applicable State and local building codes
- **Lifetime maximum of \$7,500**
- EAAs may include finishing to return the home to a habitable condition, but do not include aesthetic embellishments
- Modifications are **limited to those that are of direct medical or remedial benefit** to the Member
- Plans must provide written documentation that the **modifications are permanent** and that **the State is not responsible for maintenance, repair, or removal** before making physical adaptations to the home

Who can provide Environmental Accessibility Adaptations?

Area
Agencies on
Aging (AAA)

Local Health
Departments

Community-
based
providers
and
organizations

Program Benefits

- » \$867 savings in Medicaid per member per month⁵
- » 75% of participants improved their performance of activities of daily living (ADLs)⁶
 - » 49% reduction in difficulty with ADLs⁶
- » 26% decrease in at-home falls⁷

Pricing Guidance

- » The Non-Binding ILOS Pricing Guidance outlines a high-level pricing approach.
- » The cap for these services is aligned with current spending caps to promote consistency between programs and services.

Environmental Accessibility Provider Promising Practices

Esther Honig, Director of External Affairs, Libertana Home Health

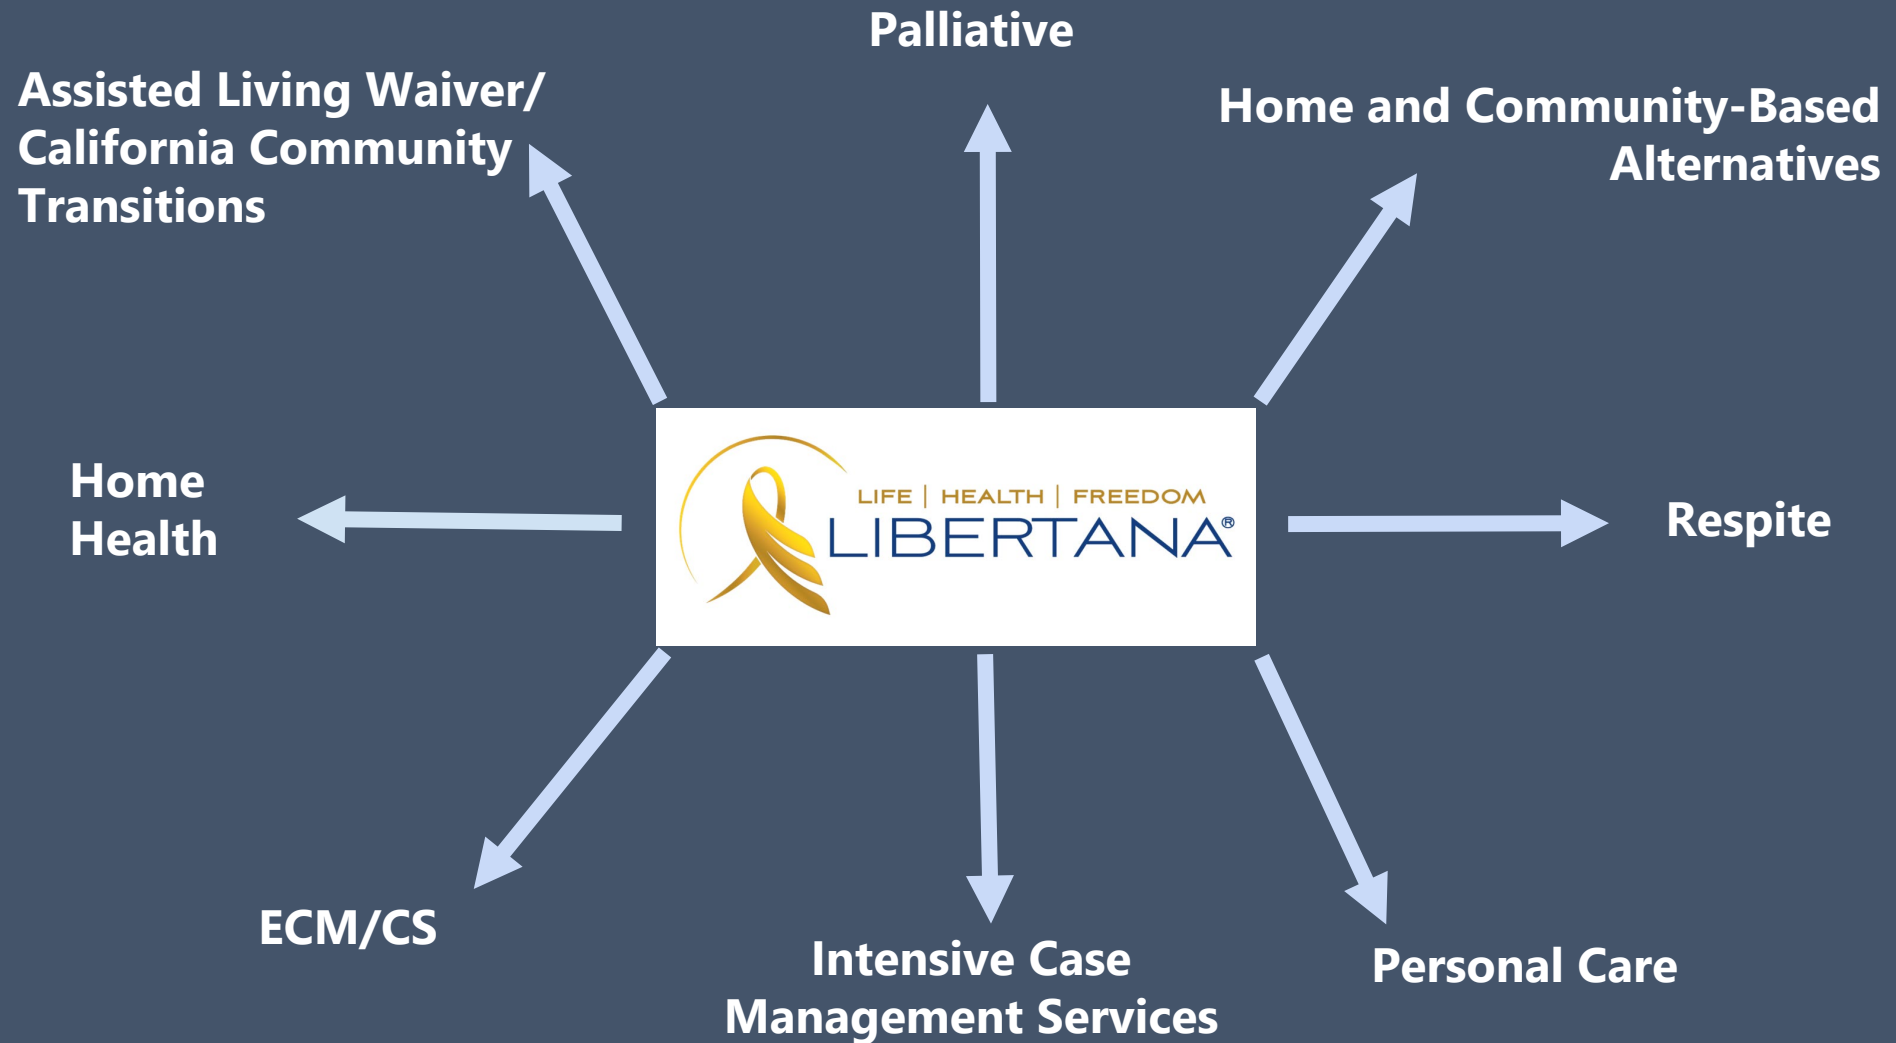

LIFE | HEALTH | FREEDOM

LIBERTANA®

Who we are

Environmental Accessibility Adaptations (Home Modifications)

Physical adaptations to a home necessary to allow for greater independence.

Widening Doorways

Stair Lifts

Bathroom and Shower
Wheelchair Accessibility

PERS systems

Ramps and Grab Bars

Requirements

- » A Physical or Occupational Therapist's evaluation and report requesting a service or equipment
- » Evaluation must include one of the following:
 - » Evaluation of the member and current equipment needs, and how former equipment is insufficient
 - » Evaluation of requested equipment with an explanation for how it will reduce institutionalization
 - » A description of how equipment has been insufficient in the past

Process

- » Assessment of the clients' needs are conducted by the clients' care team
 - » Care team is comprised of the clients' case manager, social worker and/or caregivers
- » Assess whether placement of the client has been secured. If the individual is moving into a rented unit, we work with the landlord to ensure potential modifications are approved
- » We request a minimum of two bids from separate contractors who are insured and licensed under Contractors State License Board (CSLB) for the requested service(s)
- » Submit the requests through proper channels (i.e., the state or the Managed Care Plan). Once authorized, facilitate contracting between the client and the awarded bidder to perform work
- » Ensure the work was completed satisfactorily

Authorization Guides

Authorization Guide for Asthma Remediation

Asthma Remediations are physical modifications to a home that are necessary to ensure the health, welfare, and safety of the individual.

This service is covered for a duration for up to 90 days. Extensions are allowed based upon estimate for completion of the remediation.

Members must meet the following criteria to qualify for the Asthma Remediation service:

<p>Eligibility</p> <p>Member meets the criteria for poorly controlled asthma:</p> <ul style="list-style-type: none"> In the past 12 months: <ul style="list-style-type: none"> an emergency department visit or hospitalization, or two sick or urgent care visits in the past 12 months, or A score of 19 or lower on the asthma control test. 	<p>Restrictions</p> <ul style="list-style-type: none"> Member is part of a duplicative asthma remediation program. Limited to those that are of direct medical or remedial benefit to the member. Excludes adaptations or improvements that are of general utility to the household. Must be conducted in accordance with applicable state and local building codes. Home must be owned, rented, leased, or occupied by member or caregiver.
<p>Required documentation</p> <p>Member must meet one of the following to get asthma remediation:</p> <ul style="list-style-type: none"> A licensed provider's order specifying the requested service. A written evaluation describing how and why the service meets the needs of the individual. Proof that a home visit has been conducted to determine the suitability of any requested service. 	<p>Member education</p> <ul style="list-style-type: none"> Identification of environmental triggers commonly found in and around the home, including allergens and irritants. Using dust-proof mattress and pillow covers, HEPA vacuums, asthma-friendly cleaning products, dehumidifiers, and air filters. Health-related minor home repairs such as pest management or patching holes and cracks through which pests can enter.
<p>For permanent adaptations or installations</p> <ul style="list-style-type: none"> Must provide the owner and member with written documentation that the modifications are permanent, and that the state is not responsible for maintenance or repair of any modification or for removal of any modification if the member ceases to reside at the residence. 	<p>Examples of asthma remediation</p> <ul style="list-style-type: none"> Allergen-impermeable mattress and pillow dustcovers. High-efficiency particulate air (HEPA) filtered vacuums. Integrated Pest Management (IPM) services. De-humidifiers. Air filters. Other moisture-controlling interventions. Minor mold removal and remediation services. Ventilation improvements. Asthma-friendly cleaning products and supplies. Other interventions identified to be medically appropriate and cost effective.

Key Learnings

Lessons Learned & Recommendations: Phase One of CalAIM Implementation

1 Extensive collaboration with plan partners and providers is paramount

Key Finding: At the direction of DHCS, Health Net and our plan partners collaborated in an unprecedented manner to minimize administrative burdens on providers, counties and others. We extended this model of collaboration and support to our relationships with locally embedded providers.

Recommendation: Day by day, week by week, work hand-in-hand with plan partners, aligned to the vision and goals of CalAIM. **Lean into the deep knowledge of local providers** who are viewed as trusted advisors by residents. Their county-specific knowledge is critical to deliver the culturally responsive care that is key to reducing health disparities within the Medi-Cal population.

2 Foundational need for operational support and funding for local providers

Key Finding: By design, Health Net brought many Community Supports providers into the company's network who were new to Medi-Cal managed care. This meant that the development of infrastructure, capacity building and operational support was key to meet program requirements, as required by DHCS. Comprehensive trainings and funding ensured providers were prepared to deliver care from day one of implementation.

Recommendation: **Continue to invest** in workforce development, training and recruitment to build new capacity and invest in technology to support service efficiency and reach.

3 Essential role of timely and complete data sharing

Key Finding: Accurate data allowed Health Net to understand the Community Supports needs of the communities we serve, which greatly informed how and where we are implementing Community Supports and who we identify as the providers best suited to serve our Medi-Cal members.

Recommendation: **Leverage connected information systems** that offer integrated data on social drivers of health that impact Medi-Cal members to ensure they are receiving the care they need. Closing the information loop between Community Supports programs and CBOs will result in a more seamless beneficiary experience.
