Alternative Access Standards Tables

The tables in this appendix present key reporting elements defined in WIC section 14197.05 regarding alternative access standards requests for provider networks. Please see the *Medi-Cal Managed Care External Quality Review Technical Report, July 1, 2019–June 30, 2020*, for a summary of results.

Table 1—Reporting Elements 1 and 6

Table 1 shows the number and final disposition of MCPs' alternative access standards requests for time and distance. Results are presented according to the MCP's service area (County and ZIP Code) and provider type (Adult/Pediatric/N/A and Provider Type [Including Specialists]). There were 19,224 requests submitted to DHCS, and 10,629 distinct combinations of characteristics appeared in the request and decision data supplied by DHCS. The analysis is based on alternative access standards requests submitted to DHCS between March 1, 2019, and January 31, 2020.

Note the following regarding Table 1:

- ◆ Requests for alternative access standards with missing or invalid ZIP Codes were excluded. All other requests submitted by MCPs were counted, including resubmissions for a given service area and provider type.
- ◆ Provider type is reported as "NR" (not reportable) if the MCP's request does not include a valid provider type.
- ◆ Adult and Pediatric provider types are reported as "N/A" for Hospital, OB/GYN PCP, and Pharmacy providers, and may be reported as "N/A" for OB/GYN specialists (listed as OB/GYN in the table). They may also be reported as "N/A" for Mental Health (non-psychiatry) Outpatient Services because this information was not collected for renewal requests submitted in 2019–20 for this provider type.
- ◆ Requests approved by DHCS are reported as "Approved"; requests that are denied, partially denied, or deemed no longer necessary by DHCS as the MCP was meeting the time and distance standard are reported as "Denied."
- ◆ If the final disposition of a request is "No decision," DHCS had not reported a decision as of January 30, 2020. A "No decision" is mainly due to the ZIP Code being a post office box or a unique ZIP Code for which an alternative access standard is not necessary. Regardless of whether the final disposition is "No decision," all MCPs received their overall results for all alternative access standards requests by the end of the corrective action period.

Table 2—Reporting Elements 3 and 4

Table 2 shows the median distance and drive time between the nearest network provider and ZIP Code of the beneficiary furthest from that provider in alternative access standards requests submitted to DHCS, and the median number of beneficiaries impacted. Minimum, maximum, and median values are presented by MCP and ZIP Code for distance, drive time, and number of beneficiaries impacted.

Note the following regarding Table 2:

- ◆ Calculations in this table are based on all submitted alternative access standards requests except those with missing or invalid ZIP Codes.
- ◆ Not all requests were approved, and DHCS approvals may have included distance or travel time standards differing from the submitted requests.
- ◆ “No data” messages indicate that no information was submitted by the MCP for distance, travel time, or number of beneficiaries impacted by alternative access standards requests for the specified ZIP Code.
- ◆ S = If the median number of beneficiaries impacted is less than 11, HSAG suppresses displaying the number in this appendix to satisfy the Health Insurance Portability and Accountability Act of 1996 Privacy Rule’s de-identification standard.

Table 3—Reporting Element 9—Initial Submission Period

Table 3 presents the number of alternative access standards requests submitted and the median number of days between the initial submission of an alternative access standards request and the delivery of an initial approval or denial by DHCS for each MCP that submitted alternative access standards requests during the initial review between February 1, 2019, and June 30, 2019.

In accordance with WIC section 14197(e)(3), DHCS must approve or deny an alternative access standard request within 90 days of the initial submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny the alternative access standards request within 30 days of submission of the additional information.

Note the following regarding Table 3:

- ◆ Alternative access standards requests with missing or invalid ZIP Codes were excluded.
- ◆ Median days were calculated only using initial requests for which a decision was rendered before January 31, 2020.¹
- ◆ The number of days is the difference between the date an alternative access standards request was first submitted by the MCP for a specific service area and type of provider and the date of the earliest decision delivered by DHCS.
- ◆ NR = not reportable. No decisions were rendered before January 31, 2020, for initial requests submitted by the MCP during this period.

Table 4—Reporting Element 9—Resubmission Period

Table 4 presents the number of alternative access standards requests submitted and the median number of days between the initial submission of an alternative access standards request and the delivery of an initial approval or denial by DHCS for each MCP that submitted alternative access standards requests during the CAP review between July 1, 2019, and January 31, 2020.

In accordance with WIC section 14197(e)(3), DHCS must approve or deny an alternative access standard request within 90 days of the initial submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny the alternative access standards request within 30 days of submission of the additional information.

Table 5—Reporting Element 10—Ombudsman Issues

Table 5 summarizes data on consumer complaints communicated to the Medi-Cal Managed Care Office of the Ombudsman related to access to providers. The reporting period for the Ombudsman data is February 1, 2019, through January 30, 2020.

Note the following regarding Table 5:

- ◆ Calls were categorized by the Office of the Ombudsman. The categories relevant to alternative access standards are as follows:
 - Assigned PCP Outside 10 Mile/30 Minute Radius
 - Plan Lacks Available Provider in Beneficiary's Area
 - No Specialist in Network

² The median was chosen to represent the time to a decision at the 50th percentile in Table 4. This measure was chosen because it is not easily influenced by outliers (e.g., a small number of requests with unusually long time frames to a decision).

Table 7.1 through Table 7.58—Reporting Element 5

Reporting Element 5 is defined by WIC section 14197.05 as the percentage of providers in the plan service area by provider and specialty type that are under contract with a Medi-Cal MCP. Table 7.1 through Table 7.58 show the number of providers that an MCP has under contract within a plan service area and the number of providers under contract by the MCP as a percentage of providers in the service area under contract with any MCP, by provider type (Adult/Pediatric/N/A and Provider Type [Including Specialists]).

Limitation

The calculation of Reporting Element 5 requires the number of MCP providers as defined in the 274 Provider Demographic data to identify the numerator for the percentage. The denominator for the percentage requires a count of the number of providers practicing in a given service area. Review of the California Medical Board (CMB) licensing data determined that the licensing data do not contain adequate information about providers' practice locations to be a reliable estimate of the total number of providers for a specific county. Furthermore, the 274 Provider Demographic data and CMB licensing data could not be linked by a National Provider Identifier (NPI) or license number to ensure that providers identified in the 274 file were also identified in the CMB data. For these reasons, the available data are limited in their ability to identify the denominator as defined above. The total number of providers practicing in a service area will be larger than the number of Medi-Cal contracted providers, making the actual percentage of providers under contract with Medi-Cal MCPs smaller than what is reported in Table 7.1 through Table 7.58.

Note the following regarding Table 7.1 through Table 7.58:

- ◆ Adult and Pediatric provider types are derived using a “sees children” indicator in plan-submitted 274 Provider Demographic data and not from taxonomy codes. The Adult/Pediatric/NA field is reported as “True” for providers who see both children and adults or only children, “False” for providers who do not see children, and “N/A” for Hospital and Pharmacy providers.
- ◆ The number (percent) of providers in the county contracted by the MCP is limited to providers with addresses in the county to allow accurate comparisons across MCPs serving the same county. While MCPs may contract with providers outside a county to provide needed coverage, they are not required to do so. The actual number of providers with whom the MCP contracts to serve the county may therefore be larger than the total number of providers located within the county.
- ◆ The number (percent) of providers in the county contracted by the MCP is reported as “N/A” if there are no providers of a given type (Adult/Pediatric/N/A and Provider Type [Including Specialists]) located in the county that are contracted with any MCP.
