## Alternative Access Standards Tables

The tables in this appendix present key reporting elements defined in WIC section 14197.05 regarding alternative access standard requests for provider networks. Please see the *Medi-Cal Managed Care External Quality Review Technical Report, July 1, 2020–June 30, 2021*, for a summary of results.

### **Table 1—Reporting Elements 1 and 6**

Table 1 shows the number and final disposition of MCPs’ alternative access standard requests for time and distance. Results are presented according to the MCP’s service area (County and ZIP Code) and provider type (Adult/Pediatric/N/A and Provider Type [Including Specialists]). There were 29,029 requests submitted to DHCS, and 16,171 distinct combinations of characteristics appeared in the request and decision data supplied by DHCS. The analysis is based on alternative access standard requests submitted to DHCS between May 12, 2020, and May 27, 2021.

Note the following regarding Table 1:

- ◆ Requests for alternative access standards with missing or invalid ZIP Codes were excluded. All other requests submitted by MCPs were counted, including resubmissions for a given service area and provider type.
- ◆ Adult and Pediatric provider types are reported as “N/A” for Hospital, Pharmacy, and OB/GYN providers.
- ◆ Requests approved by DHCS are reported as “Approved”; requests that are denied, partially denied, or deemed no longer necessary by DHCS because the MCP was meeting the time and distance standard are reported as “Denied.”
- ◆ If the final disposition of a request is “No decision,” DHCS had not reported a decision as of May 26, 2021. A “No decision” is mainly due to the ZIP Code being a post office box or a unique ZIP Code for which an alternative access standard is not necessary. Regardless of whether the final disposition is “No decision,” all MCPs received their overall results for all alternative access standard requests by the end of the corrective action period.

**Table 2—Reporting Elements 3 and 4**

Table 2 shows the median distance and drive time between the nearest network provider and ZIP Code of the beneficiary furthest from that provider in alternative access standard requests submitted to DHCS, and the median number of beneficiaries impacted. Minimum, maximum, and median values are presented by MCP and ZIP Code for distance, drive time, and number of beneficiaries impacted.

Note the following regarding Table 2:

- ◆ Calculations in this table are based on all submitted alternative access standard requests except those with missing or invalid ZIP Codes.
- ◆ Not all requests were approved, and DHCS approvals may have included distance or travel time standards differing from the submitted requests.
- ◆ “No data” messages indicate that no information was submitted by the MCP for the number of beneficiaries impacted by alternative access standard requests for the specified ZIP Code.

### Table 3—Reporting Element 9—Initial Submission Period

Table 3 presents the number of alternative access standard requests submitted and the median number of days between the initial submission of an alternative access standard request and the delivery of an initial approval or denial by DHCS for each MCP that submitted alternative access standard requests during the initial review between May 12, 2020, and October 12, 2020.

In accordance with WIC section 14197(e)(3), DHCS must approve or deny an alternative access standard request within 90 days of the initial submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny the alternative access standard request within 30 days of submission of the additional information.

Note the following regarding Table 3:

- ◆ Alternative access standard requests with missing or invalid ZIP Codes were excluded.
- ◆ Median days were calculated only using initial requests for which a decision was rendered before May 18, 2021.<sup>1</sup>
- ◆ The number of days is the difference between the date an alternative access standard request was first submitted by the MCP for a specific service area and type of provider and the date of the earliest decision delivered by DHCS.
- ◆ NR = not reportable. No decisions were rendered before May 18, 2021, for initial requests submitted by the MCP during this period.

**Table 4—Reporting Element 9—Resubmission Period**

Table 4 presents the number of alternative access standard requests submitted and the median number of days between the initial submission of an alternative access standard request and the delivery of an initial approval or denial by DHCS for each MCP that submitted alternative access standard requests during the CAP review between October 13, 2020, and May 27, 2021.

In accordance with WIC section 14197(e)(3), DHCS must approve or deny an alternative access standard request within 90 days of the initial submission. DHCS may stop the 90-day review time frame on one or more occasions as necessary if an incomplete MCP submission is received or if additional information is needed from the MCP. Upon submission of the additional information to DHCS, the 90-day time frame would resume at the same point in time it was previously stopped, unless fewer than 30 days remain. In these instances, DHCS must approve or deny the alternative access standard request within 30 days of submission of the additional information.

Note the following regarding Table 4:

### **Table 6.1 through Table 6.58—Reporting Element 5**

Reporting Element 5 is defined by WIC §14197.05<sup>3</sup> as the percentage of providers in the plan service area by provider and specialty type that are under contract with a Medi-Cal MCP. Table 6.1 through Table 6.58 show the number of providers that an MCP has under contract within a plan service area and the number of providers under contract by the MCP as a percentage of providers in the service area under contract with any MCP, by provider type (Adult/Pediatric/N/A and Provider Type [Including Specialists]). Note that if the total number of providers in the service area had been the denominator for calculation of the percentage rather than the number of providers under contract with any MCP, the percentage would likely be smaller. This makes the percentage reported in Table 6.1 through Table 6.58 the upper limit of the number of providers under contract by the MCP as a percentage of all providers in the service area. For additional information, see the “Limitation” subsection below.

#### **Limitation**

The calculation of Reporting Element 5 requires the number of MCP providers as defined in the 274 Provider Demographic data to identify the numerator for the percentage. The denominator for the percentage requires a count of the number of providers practicing in a given service area. Review of the California Medical Board (CMB) licensing data determined that the licensing data do not contain adequate information about providers’ practice locations to be a reliable estimate of the total number of providers for a specific county. Furthermore, the 274 Provider Demographic data and CMB licensing data could not be linked by a national provider identifier (NPI) or license number to ensure that providers identified in the 274 file were also identified in the CMB data. For these reasons, the available data are limited in their ability to identify the denominator as defined above. The alternative denominator used in Table 6.1 through Table 6.58 is the count of providers physically located in the plan service area that are under contract with any MCP. The total number of providers located in a service area will be larger than the number of Medi-Cal contracted providers, making the actual percentage of providers under contract with Medi-Cal MCPs smaller than the percentage reported in Table 6.1 through Table 6.58.

Note the following regarding Table 6.1 through Table 6.58:

- ◆ Adult and Pediatric provider types are derived using a “sees children” indicator in plan-submitted 274 Provider Demographic data and not from taxonomy codes. The Adult/Pediatric/N/A field is reported as “True” for providers who see both children and adults or only children, “False” for providers who do not see children, and “N/A” for Hospital and Pharmacy providers.
- ◆ The number (percent) of providers in the county contracted by the MCP is limited to providers with addresses in the county to allow accurate comparisons across MCPs serving

the same county. While MCPs may contract with providers outside a county to provide needed coverage, they are not required to do so. The actual number of providers contracted by the MCP to serve the county may therefore be larger than the total number of providers located within the county.

- ◆ The number (percent) of providers in the county contracted by the MCP is reported as “N/A” if there are no providers of a given type (Adult/Pediatric/N/A and Provider Type [Including Specialists]) located in the county that are contracted with any MCP.
