

Tribal FQHC Alternative Payment Methodology (APM) Rates ¹	CY 2023 Rates
Dual Rate (Medi-Cal beneficiaries with full Medicare coverage or Medicare Part B only) ²	\$503.50 (CY 2022 \$495.87) (CY 2021 \$371.49)
Non-Dual Rate (Medi-Cal beneficiaries that do not have Medicare Coverage or has Medicare Part A only)	\$654 (CY 2022 \$640) (CY 2021 \$519)

¹ The APM was established by reference to payments to one or more other non-Tribal FQHCs with similar caseloads in each county.

² To illustrate using the amounts applicable in 2023: The “Outpatient per Visit Rate (Excluding Medicare)” is \$654. The 42 USC 1395w-4 Medicare Prospective Payment System (PPS) rate calculated using the Geographic Adjustment Factor (GAF) for Locality #75 (Rest of California) is equal to \$188.13, which is the product of the FQHC PPS base payment rate of \$187.19 multiplied by the GAF of 1.005. The 80 percent multiplier reduces this PPS rate to \$150.50 (the 20 percent reduction accounts for any coinsurance requirements that would be covered by Medi-Cal for dual eligible beneficiaries). Thus the required payment is \$503.50. The [2023 FQHC PPS base payment rate](#) and [2023 GAF](#) was verified on March 1, 2023.
