# California Department of Mental Health Short-Doyle / Medi-Cal System

# Duplicate Service Technical Description June 5, 2008

## **Duplicate Claim**

A duplicate service claim in the Short-Doyle / Medi-Cal (SD/MC) is defined as the second and all subsequent claims that match <u>all</u> of the following eight criteria:

- 1. Person
- 2. Provider (Service Facility Location)
- 3. Date of service
- 4. Mode of service
- 5. Service function
- 6. Units of service
- 7. Units of time
- 8. Net Billed amount

The subsequent claim will be suspended for duplicate correction (error code 27) unless the claim has a duplicate override code that has been placed on the claim by the county. This code is used by the county to certify that the county has verified the identified service is not an actual duplicate claim for reasons such as different time of service, procedure, or rendering provider. Use of the override is predicated on the review of client records by a licensed clinician and that the services were appropriate and medically necessary.

#### <u>Duplicate Service Override Codes</u>

The allowable override codes are listed below and in "Table E – Duplicate Payment Override Code Crosswalk" of the DMH HIPAA Companion Guide.

- 59 Distinct Procedural Service
- 76 Repeat Procedure by Same person (rendering provider)
- 77 Repeat Procedure by Different person (rendering provider)

#### 837 Claim Fields Related to the Duplicate Edit

The eight duplicate service criteria are created by translation of various fields in the 837 claim. These 837 fields are listed below so that billing providers are aware of the relationship between the 837 claim and the SD/MC duplicate edit.

- 1. Subscriber
- 2. Provider (Service Facility Location)

- 3. Date of service
- 4. Procedure Code, Modifier, Place of Service, Taxonomy, Units

"Table K – Crosswalk 837P To SD/MC Mode Of Service And Service Functions" from the DMH HIPAA Companion Guide describes how 837 procedure codes, modifiers, place of service, provider taxonomy, and units will be used to create the current SD/MC mode of service and service function codes that will be used for claim processing. The modifier is also the field for placing a duplicate override, if applicable.

A duplicate override code may be necessary even if claims have different values for the procedure code, modifier, place of service, taxonomy, units since they may be translated into the same mode of service and service function.

#### 5. Units

The Units field on the 837 corresponds to the units of time for all but 24 hour services, where it corresponds to units of service. See the DMH HIPAA Companion Guide for more information on the Units field and its use in the service procedure crosswalks.

#### 6. Line Item Charge Amount

The Line Item Charge Amount field on the 837 may not match the Line Item Charge Amount field on the 835 because the gross amount coming in on the 837 is adjusted to create the Net Billed Amount in the SD/MC system, which is reported in the Line Item Charge Amount field on the 835. The Net Billed Amount is the value used as one of the criteria in the SD/MC system duplicate service evaluation. Refer to the DMH HIPAA Companion Guide for the calculations used to create the Net Billed Amount.

#### **Maximum Service Times and Lockouts**

The SD/MC Table of Multiple-Service Billing Edits, shown below, describes maximum service times and lockout conditions for a specific recipient and date of service.

Lockouts (L) are claims for mutually exclusive activities, which are services that should never occur on the same day for the same recipient and will not be approved for reimbursement. Some claims for services may occur on the day of admission (A) but are lockouts on other days.

Multiple Services are claims for services for the same day and recipient that are approved for reimbursement, up to the maximum accumulation of units of time for each Service Category and subject to the Statewide Maximum Allowance (SMA), or maximum payment allowed per unit of time for each Service Category. For inpatient claims, the discharge day (day the patient is leaving the hospital) will not be counted since there is no service on that day. Services for the same day for the same recipient may be approved for reimbursement with an indicated appropriate override code.

#### **Duplicate Service Error Messages**

The duplicate service error messages and codes are listed in "Table J – SD/MC Error Code Crosswalk" of the DMH HIPAA Companion Guide. These errors and their descriptions are listed below. Service claims that may result in SD/MC error code "27" may be prevented by indicating the appropriate duplicate override code in the originally submitted claim so long as the accumulated service time does not exceed the listed maximums. If the lockout conditions are met, the related services will be suspended with a duplicate error "26", which cannot be corrected with an override code.

#### SD/MC Error Code 26 "DUPLICATE SERVICE – NO OVERRIDE"

This indicates the SD/MC system has found a duplicate service for which this service has no possible overrides. This is the case where the services are listed as a lockout ("A" or "L") in the SD/MC Table of Multiple-Service Billing Edits. The service on the Duplicate ECR may only be corrected so that the claim no longer meets the lockout condition or by deleting the claim.

#### SD/MC Error Code 27 "MULTIPLE SERVICE – OVERRIDE OK"

This indicates the SD/MC system found a duplicate service for which this service may be corrected with an override code, if appropriate, or deleted if the service is not for an appropriate documented duplicate service.

#### SD/MC Error Code 23 "UNITS > ALLOWED"

This indicates the SD/MC system has found a service, when added to previously approved claim(s), exceeds the maximum amount of time allowed. Correct the appropriate fields or delete the claim. There is no override possible for this error. If other fields are not in error, correct the units,. Be sure to use leading zeros, that is, if the units are "2" enter "0002."

I Institutional Limitations - Audit

L Lockout - Services that may not occur on the same day

A Lockout except for day of admission

T Lockout during actual time service is provided - audit, not a computer edit

Multiple services may be allowed on the same day, limited by the maximum time allowed.

(1) Maximum of 4 hours (240 Minutes) per day

(4) Maximum of 24 hours (1440 minutes) per day

(2) Maximum of 8 hours (480 minutes) per day

(5) Maximum of 2878 minutes per day

(3) Maximum of 20 hours per 24 hour period

(6) An Administrative Day may not be billed on the day of admission

3

# SD/MC Duplicate and Multiple-Service Billing Scenarios

The following nine billing scenarios show sequences of service claims and the resulting claim approval or denial, depending on the values of the eight duplicate criteria fields, duplicate override code, and admission date.

## **Duplicates that fail the edits**

| 1 | Client    | Provider | Date of<br>Service | Mode of<br>Service | Service<br>Function | Units of<br>Service | Units<br>of<br>Time | Net Billed<br>Amount | Duplicate<br>Override | Comments                  | Admission Date |

|   | C1234567A | 6701     | 2/2/2005           | 18                 | 10                  | 1                   | 50                  | \$122.00             |                       |                           |                |
|   | C1234567A | 6701     | 2/2/2005           | 18                 | 10                  | 1                   | 50                  | \$122.00             |                       | Failed the duplicate edit |                |

When two or more records LOOK like duplicates, an override code will allow them to pass the duplicate edit. This might occur when two clinicians at the same provider provide concurrent services.
