## 20. Extended Services for Pregnant Women

## a. Pregnancy-related and postpartum services for 60 days after pregnancy ends.

Provided: Pregnancy-related and postpartum services include all antepartum (prenatal) care, care during labor and delivery, postpartum care, and family planning. Pregnancy-related services include all care normally provided during pregnancy (examinations, routine urine analyses, evaluations, counseling, and treatment) and labor and delivery (initial and ongoing assessment of maternal and fetal well-being and progress of labor, management of analgesia and local or pudendal anesthesia, vaginal delivery with or without episiotomy, initial assessment and, when necessary, resuscitation of the newborn infant). Postpartum care includes those services (hospital and scheduled office visits during the puerperium, assessment of uterine involution and, as appropriate, contraceptive counseling) provided for 60 days after pregnancy ends. Family planning services include contraceptive counseling and tubal ligation.

Pregnancy-related and postpartum services may also include outpatient alcohol and other drug treatment services that ameliorate conditions that complicate pregnancy when prescribed by a physician as medically necessary. These services include women-specific treatment and recovery services.

See Supplement 3 to Attachment 3.1-B page 1 for a complete description of services available to all beneficiaries

## b. Services for any other medical conditions that may complicate pregnancy.

Provided: Treatment for obstetrical complications (including preexisting or developing maternal or fetal conditions) which create a high-risk pregnancy and which may or may not be pregnancy-related is also covered.
