Subject: DHCS - LEA BOP: Audits from Surviving to Thriving workshop

**You are invited to join our next LEA BOP workshop:
Audits, from Surviving to Thriving
on November 30, 2022 2:00-3:30 pm**

The Department of Health Care Services (DHCS) is seeking to raise awareness among LEAs about the benefits of the LEA Medi-Cal Billing Option Program (BOP) that allows schools to draw down federal matching funds for services already provided to students.

Through this outreach campaign, DHCS will continue its mission to support LEAs through the process of enrolling, implementing, and maximizing their participation in the LEA BOP by providing technical assistance and facilitating increased understanding of program operations.

As a component of this outreach campaign, DHCS will conduct a series of specialized workshops intended to provide currently enrolled LEAs with a better understanding of the LEA BOP program leading to more successful outcomes for LEAs. WestEd will serve as the TA contractor for this outreach initiative.

The first workshop will convene LEA representatives with a common interest in surviving and thriving in the audits process. This workshop will include a breakout opportunity to allow collaboration with LEAs and collect feedback that will inform future workshops. The first workshop will include topics such as:

- CRCS due dates and payment updates
- Certified Public Expenditure (CPE) Programs
- Effective practices for cost-based programs
- Delineating the audit process and recoupment data
- Top tools LEAs need for an audit

Please share this information with LEA BOP coordinators, business office staff and fellow LEAs who may be interested in joining this workshop. Please use the form linked below to sign up. If you have any questions regarding this workshop, contact Liza Morris at lmorris@wested.org.
