

Medi-Cal DRG 3M Grouper Settings for CA State Fiscal Year 2019-20 (2/17/2021)

This document provides the setup parameters for the 3M™ APR-DRG Core Grouping Software (CGS) desktop grouper for CA state fiscal year (SFY) 2019-20 claims. The required settings shown in this document correspond to the settings used within the California Medicaid Management System (CAMMIS) mainframe grouper, which pays Medi-Cal DRG claims.

Some important points to consider:

- Medi-Cal policy for each SFY is applied based upon the admission date of the claim. The grouper settings must be set to **Keyed by:** Admit date.
- These settings will vary based on the claims' admission and discharge dates. See Table 1 and Figure 1 for full details of settings to enter.
 - **Interpretation of undetermined POA indicators:** The POA indicators of W and U will be treated as N by the system.
 - **HAC version:** For admissions from 7/1/19 through 9/30/19 with discharges before 10/1/19, use HAC version 36.0 for California Medicaid per Table 1: Scenario A and Figure 1. For admissions with discharges on or after 10/1/19, use version 37.0 for California Medicaid per Table 1: Scenario B and Figure 2. For admissions with discharges on or after 4/1/20, use version 37.1 for California Medicaid per Table 1: Scenario C and Figure 3.
 - **Birth weight option:** For all newborn claims with a birth weight below normal, the reduced weight must be entered as a diagnosis code or the system will process the claim with a default of normal birthweight.
 - **Entered code mapping:** For admissions from 7/1/19 through 9/30/19, with a discharge date before 10/1/2019, entered code mapping should be set to "ICD-10-CM/PCS version 36.0 effective 10/01/2018." For admissions from 7/1/19 through 3/31/20, with a discharge date on or after 10/1/19, entered code mapping should be set to "ICD-10-CM/PCS version 37.0 effective 10/1/2019." For admissions from 7/1/19 through 6/30/20, with a discharge date on or after 4/1/20, entered code mapping should be set to "ICD-10-CM/PCS version 37.1 effective 4/1/2020."
 - **Mapping type:** All admissions from 7/1/19 through 6/30/20 require historical mapping.

Using CSV files to import grouper settings

A comma separated value (CSV) file containing the grouper settings for this year of DRG is available for download on the [DRG webpage](#) in the Pricing Resources section. You can use this file to import the grouper settings into the 3M CGS Schedule Setup Module instead of manual entry. Instructions for importing the CSV file are posted in the same section.
