

## Meaningful Use Documentation

Beginning in the 2019 Program Year, DHCS requires that documentation supporting meaningful use (MU) attestations be uploaded into the State Level Registry (SLR) before a MU attestation can be reviewed and approved. This documentation should include a copy of the MU dashboard report produced by the electronic health record or an equivalent data source. The documentation should also include a copy of the Security Risk Analysis (SRA) or a signed letter describing the SRA. [Click here](#) for further information about the SRA documentation. Any upload button in the SLR can be used for this purpose. Upload buttons can be found at the bottom of every MU objective page.

Alternatively, documentation for individual professionals in a group/clinic can be uploaded into the group/clinic SLR account, as long as separate MU data is provided for each professional. In the case of a group/clinic, the SRA documentation does not have to be specific for each professional. Providers in a group/clinic should speak with their group/clinic representative regarding uploading MU documentation into the group/clinic SLR account.
