Subject: Thriving in Audits, Part 2 – How to Survive Common Challenges

**You are invited to join our next LEA BOP workshop:
Thriving in Audits, Part 2 –
How to Survive Common Challenges
on January 11, 2023 | 1:00 p.m. - 2:30 p.m.**

Dear LEA BOP Program Participant,

The Department of Health Care Services (DHCS) is raising awareness among LEAs about the benefits of the LEA Medi-Cal Billing Option Program (BOP) which allows schools to draw down federal matching funds for services already provided to students.

Through this outreach campaign, DHCS will continue its mission to support LEAs through the process of enrolling, implementing, and maximizing their participation in the LEA BOP by providing technical assistance and facilitating increased understanding of program operations.

As a component of this outreach campaign, DHCS will conduct a series of specialized workshops intended to provide currently enrolled LEAs with a better understanding of the LEA BOP program leading to more successful outcomes for LEAs. WestEd will serve as the TA contractor for this outreach initiative.

This second workshop builds on information presented during the first training by diving deeper into common challenges around certified public expenditures. Join representatives from Audits and Investigations to get more specific details about common audit findings, the impact on disallowances, and best practices your LEA can employ to be better prepared for audits. Presenters will also unveil draft tools to support LEAs through the audit process, refined through feedback received during the first training.

Please share this information with LEA BOP coordinators, business office staff and fellow LEAs who may be interested in joining this workshop. Please use the form linked below to sign up. **You may submit questions for Audits & Investigations via the registration form. Questions submitted before December 31, 2022, will be considered for response during the training. All other questions will**

receive an email response from DHCS. If you have any questions regarding this workshop, contact Colleen Meacham at cmeacha@wested.org.
