

Medi-Cal Dental Services Division

2022 Statewide Provider Network Capacity Survey

The goal of this survey is to understand how the current provider network was affected by the restoration of adult dental services and managing the increase in the member population. The survey results provide useful information on hours of operations and population of provider offices, appointment capacity, and potential barriers for Medi-Cal dental patients to access services. In May 2022, DHCS issued 4,801 mailed surveys and 1,605 (33%) responded by mail with an additional 441 received online. In September 2022, the results were captured and are summarized below.

Type of Practice and Office Operations

- 91% of the dentists are full time general dentists, with an average of 1-5 dentists per office.
- Full time specialists in office: Pediatric (13 percent); Orthodontics (10 percent); Hygienist (8 percent); Oral & Maxillofacial Surgery (7 percent); Endodontics (7 percent); Periodontics (5 percent)
- Dental Offices with in-office language assistance services:
 - Spanish: 86 percent
 - Farsi: 18 percent
 - Tagalog: 15 percent
 - Vietnamese: 14 percent
 - Korean, Arabic: 10 percent
 - Chinese, Hindi: 9 percent
 - Chinese and Hindi: 9 percent
 - Russian, Armenian, Mandarin: 7 percent

Office Demographics & Special Needs

Office Appointment Availability

- 54% responded that the average wait time for a non-urgent appointment is less than 1 week with 40% responded that wait time is 1-3 weeks.
