HIPAA Health Insurance Portability and Accountability Act

**HIPAA Transaction
Standard**

HIPAA Transaction Standard is comprised of five parts:

Example: **ASC X12N 837 004010 X098**

1. **“ASC”** Source of a standard; in this case, the standard comes from the American National Standards Institute (ANSI) Accredited Standards Committee (ASC). This is occasionally shown as ‘ANSI ASC’ or just ‘ASC.’
2. **“X12N”** A subcommittee of the ANSI ASC X12 committee; the X12N subcommittee defines EDI standards used in the insurance industry.
3. **“837”** A transaction set; in the case of the 837 transaction, Institutional, Professional, and Dental variations exist.
4. **“004010”** Version of the X12 standard; this is usually referred to as ‘Version 4010.’ It identifies version 4 of the standard, Release 1, sub release 0.
5. **“X098”** Internal reference numbers; in the case of the 837 transaction, three versions exist: 837I (Institutional), 837P (Professional), and 837D (Dental). Reference numbers X096, X097, and X098 identify these, respectively.
