Executive Summary

CalHEERS Feature Release 16.2 (to be deployed on 03/07/2016) contains updates to following:

Key New Features that have been added or modified in this release:

- Eligibility & Enrollment

Key System Updates that have been deployed in this release:

- Eligibility & Enrollment
- Interfaces
- Notices

Key Fixes that have been updated or resolved in this release:

- Admin Portal
- Data Warehouse
- Enrollment Assistance
- IRS 1095 Reporting
- Individual Portal
- MEDS
- Notices
- Plan and Enrollment Management
- SAWS eHIT

Alternate Procedures that have been provided with this release:

No Longer in Effect with this release
- Enrollment Assistance
- Individual Portal

New with this release
- Admin Portal

Purpose and Scope

This document describes the content of the CalHEERS Feature Release 16.2. Any known issues are described together with key features of the release contents, alternate procedures, and actions required.

Key New Features

The following summarizes the new features included in this release.

Ref ID	Type	Previous Design/Problem	New Functionality In this Release	Pages Impacted
Eligibility & Enrollment				
Former Foster Youth (FFY) Phase II Page Flow & Schema Changes				
45507	Change Request	This functionality did not exist previously.	Eligibility criteria for Former Foster Youth (FFY) in CalHEERS includes the below mentioned: • The flow in the portal pages is changing. When a case with one individual as a single applicant attests to	NA

Ref ID	Type	Previous Design/Problem	New Functionality In this Release	Pages Impacted
			being an FFY, the pages that will be suppressed are: Tax, Health, and the Income pages. NOTE: If he/she has others on the same application, the flow of the pages will not change. In accordance with the CMS Verification Plan, the County Social Service offices (CEWs) will verify that FFY individuals were in Foster Care /Medi-Cal at age 18 and are no longer in Foster Care, qualifying them for the FFY program. Administrative verification for FFY is now allowed. • FFY are able to upload documents for verification of FFY status. • The value (Foster Parent) has been added to the dropdown list on the *Personal Data-Demographic Information* page for the question: "**Who is the Primary Caretaker of this child?**" however, the foster parents are **not** given linkage to the parent/caretaker coverage groups for Medi-Cal.	

Ref ID	Type	Previous Design/Problem	New Functionality In this Release	Pages Impacted
CCHIP Interface & integration into CalHEERS				
4846	Change Request	CCHIP eligibility determinations are integrated with CalHEERS.	Previously these children were found to be within the Covered California APTC/CSR FPL limits. With the implementation of this new program into CalHEERS these individuals will be given a new determination within the MAGI-Medi-Cal budget category Title XXI for the County Children's Health Initiative Program (CCHIP) above 266% UP TO AND INCLUDING 322% FPL. CCHIP is a state and federally funded public program and as per guidance, children eligible for CCHIP are NOT eligible for APTC. The CCHIP is only applicable for consumers in the following three counties: • San Mateo • San Francisco • Santa Clara. This program is case managed by existing designated county CCHIP offices. SAWS counties will handle eligible CCHIP consumers in the same manner that APTC/CSR/CCP consumers are handled. Verbiage updates to the CalNOD01 notice: • Added new CCHIP Specific Snippets • Changed "Renewals CCHIP Discontinuance Incarceration" to "Renewals CCHIP	NA

Ref ID	Type	Previous Design/Problem	New Functionality In this Release	Pages Impacted
			Ineligible Incarceration" CalNOD63 County Children's Health Initiative Program (CCHIP) Age Out Pre-Notice has been created. The purpose of CalNOD63 is to provide information for the primary contact of the household for information regarding the individual(s) who is currently under CCHIP coverage and why he or she may not be eligible for CCHIP in 60 days. The CalNOD63 age out notice will be triggered 60 days prior to the 19th birthday for the individual who is at the time under CCHIP Coverage. RPT03 Member Management Reporting: The CalHEERS System generates a report on a daily basis of all individuals whom for the previous day of the report run were determined either eligible or conditionally eligible for CCHIP, are being discontinued from the CCHIP program in 30 days, have had a 60 day pre-notice sent for their future discontinuance, or have moved from one CCHIP county to another CCHIP county for each respective CCHIP county. The report will be delivered to DHCS as three separate files, one for each CCHIP county, who in turn will distribute the report to each respective CCHIP county.	

Key System Updates

The following summarizes the modified features included in this release.

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
Eligibility & Enrollment				
Non-MAGI screening and Citizenship/Immigration questions will not be displayed for those members who are not applying for health benefits.				
11708	Change Request	CalHEERS displayed the Non-MAGI questions related to disability, long-term care, and Medicare, along with Citizenship and Immigration questions to non-applying members.	CalHEERS does not display and will not send via eHIT the Non-MAGI questions related to disability, long-term care, and Medicare, along with Citizenship and Immigration questions to those household members who are not applying for health benefits. When this information is received via eHIT for non-applying members, the information will not be persisted to the CalHEERS portal, nor returned on the Determination of Eligibility Response (DER).	NA
Implementation of CalHEERS Functionality for E-mail/Electronic Notification to View Notice in CalHEERS Secure Mailbox				
32825	Change Request	Consumers who selected "e-mail" as their preferred method of communication were only sent paper notices.	• When a Consumer selects "E-mail" as their Preferred Method of Communication, the CalHEERS system sends an e-mail to the Consumer that a notice is available for viewing in the CalHEERS Secure Mailbox. This e-mail will only be generated for Consumers who have a CalHEERS Account, and the e-mail is sent in the Consumer's preferred language. • The CalHEERS system will continue to send physical mail notification when an e-mail notification returns due to invalid e-mail address; a paper notice will be issued to the consumer informing them of the invalid e-mail address. • The CalHEERS system issues a paper notice to those consumers who have selected "E-mail" as the preferred means of communication notifying them	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted

			about their decision and informing that they will no longer receive paper mailings. This notice will be sent to active, closed and terminated cases.
			• This functionality does not apply to MAGI Medi-Cal notices.
			• The following notices have been added:
			   o CALNOD61A Notice for Confirmation of E-mail Preference with Account (paper notice)
			   o CALNOD61B Notice for Confirmation of E-mail Preference without Account (paper notice)
			   o CALNOD61C Notice for Undeliverable E-mail (paper notice)
			   o CALNOD61D Covered California E-mail Notification for Authorized Representatives (e-mail notice)
			   o CALNOD61E Covered California E-mail Notification for Primary Contact (e-mail notice)	

Implement Functionality for Discontinuance and Denial NOA				
50102	Change Request	• The CalHEERS system denied prior Eligible MAGI Medi-Cal individuals when a Negative Action was applied.	The CalHEERS system discontinues Pending Medi-Cal individuals that were previously Conditionally Eligible, or Eligible on Medi-Cal for the same application, when a Negative Action is applied. Note: This condition primarily happened at MAGI Medi-Cal renewal when federal hub calls are made resulting in Eligible person to go to Pending eligibility.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
Expand CalHEERS logic to support eligibility programs that are not prospective				
56211	Change Request	Multiple executions of the eligibility determination were initiated in the same or subsequent days, which were generating multiple unnecessary database segments.	The business rules have been expanded to support programs that are date dependent as well as prospective (e.g. Medi-Cal Access Program). From an end user, MEDS, eHIT perspective this change aligned how eligibility is presented to current logic with the exception that MCAP can start any day in the month versus the first of the month.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
Interfaces				
Utilize the administrative verifications from SAWS to grant a full eligibility determination in the first call to BRE.				
10804	Change Request	CalHEERS only allowed California Residency Verification at the first call from eHIT Eligibility Determination Request (EDR), if all the data elements were "administratively verified." If and when administrative verifications existed in the EDR, they were bypassed on the first call to the Business Rules Engine (BRE).	The federal hub is always called for all new intakes or new-to-CalHEERS cases from SAWS. If and when administrative verifications exist in the EDR, CalHEERS will now use them. CalHEERS now uses verification of the following elements, if "administratively verified", to grant a full eligibility determination at the first call to the BRE. • California Residency Verification • Social Security Verification • Citizenship Verification • Lawful Presence Verification • Not Receiving Minimal Essential Coverage Verification • Not Deceased Verification • Not Incarcerated Verification • Income Verification • Authorized Representative (AR) The objective of this change is to decrease the number of cases that pended during the first eligibility determination to only be determined eligible when a second eligibility determination was made. Note: County Eligibility Workers (CEWs) will see a decrease in e-verifications. Only one verification (admin or e-verification) is used by the BRE. The one verification used for the eligibility determination will be sent back in the DER.	NA
Transfer of CalNOD02 generation from CalHEERS to SAWS				
35243	Change Request	CalHEERS generated CalNOD02 (MAGI Medical Notice of Action).	SAWS will generate CalNOD02 notices, and send a copy to CalHEERS for reference, and to display in the documents and correspondence page.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
			For a period of 90 days, CalHEERS will generate notices for eligibility determinations initiated prior to the Release 16.2 cutover but authorized (dispositioned) after Release 16.2.	
SAWS eHIT Interface: 4.0 updates				
37037	Change Request	SAWS eHIT interface Schema had version 3.0	SAWS eHIT interface Schema has version 4.0 This change enhances the SAWS schema with multiple changes. The following key changes are highlighted: • Business Validations documented and enhanced • One-time instance Remove a person indicator added • Add a person indicator added • Change indicator added to Person Node • Indicator for Consumer Protection program – DI: Deemed Infant was added • New Former Foster Care questions were added as result of CR 45507 • Application identifiers for both SAWS and CalHEERS were added/enhanced • For DER, CalHEERS passes back the environment sent by SAWS • For DER-U, CalHEERS passes CalHEERS environment details • USCitizenInd , EligibleImmigrationInd and QualifiedNonCitizenAttestationInd element moved to the person level, and made optional as result of CR 11708 • A significant number of elements were made unbounded to facilitate the addition of values. • The origination codes to identify who initiated a change were added for unsolicited DERS: consumer, agent, SCR, Auto generated, CEW, CEC, Other	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted

			• Only 2 years of historical income data will be passed
			• Eligibility Evaluation Reason Code:
			  • No Qualifying Life Event
			  • Life Event is not within Period
			  • Life Event needs Verification
			• A CCHIP Eligibility program node was added
			• NaturalCitizenInd element was removed
			• MAGI Income, MAGI Income limit, and MAGI household size data element will be populated to support CR 35243/SB1341.	

colspan="5"	**Update the Business Rules Engine to calculate income using begin and end dates of each income source**
37033	Change Request	CalHEERS business rules engine (BRE) used to calculate the income for the entire month, irrespective of the start and end dates of income.	CalHEERS BRE is updated to calculate and prorate income using begin and end dates of each income source and income amounts, for all income frequencies. *Prorated Monthly Amount= Monthly Amount x # of Active Days in month / # of Total Days in month*	NA
colspan="5"	**Notices**
colspan="5"	**Remove usage of Arial Monotype fonts**
57229	Change Request	Arial Monotype font was used in the notices sent by Covered California.	Myriad Pro font is now used in the notices sent by Covered California. This change has been documented in CalNOD00 Notice Design Standards.	NA

Key Fixes

The following summarizes the key defect fixes implemented in this release.

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
Admin Portal				
22185	Defect Fix	When an admin created a notice on the *Administration Home* page and sent it to the admin supervisor for approval, no notices were displayed on the *Notice-Awaiting Approval* page for the admin supervisor to make a decision.	When an admin creates a notice on the *Administration Home* page and sends it to the admin supervisor for approval, notices are displayed in the *Notice-Awaiting Approval* page for the supervisor to make a decision.	Administration Homepage Notice-Awaiting Approval
24229	Defect Fix	When an admin attempted to apply on behalf of an individual and navigated to the *Application Signature* page and clicked on the **Submit** button, a We Apologize error was displayed.	When an admin applies on behalf of an individual and navigates to the *Application Signature* page and clicks the **Submit** button, Eligibility results are displayed.	Application Signature
25205	Defect Fix	When a user clicked on the **Referral to Other Programs** link on the *Eligibility Results* page, a We Apologize error was displayed.	When a user clicks on the **Referral to Other Programs** link on the *Eligibility Results* page, the case referrals are submitted successfully.	Eligibility Results
22721	Defect Fix	There was an alignment issue with the **Continue** button on the below mentioned pages • *Household Summary* • *Income Introduction* • *Personal Data Introduction* • *Personal Data Summary*	The alignment issue with the **Continue** button on the below mentioned pages is corrected. • *Household Summary* • *Income Introduction* • *Personal Data Introduction* • *Personal Data Summary*	Household Summary Income Introduction Personal Data Introduction Personal Data Summary
24949	Defect Fix	When a user made changes to the *My Profile* page, the update did not reflect in Oracle Identity Manager and Oracle Unified	When a user makes changes to the *My Profile* page, the update reflects in OIM / OUD.	My Profile

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
		Directory (OIM) / OUD).		
24666	Defect Fix	Hover text on the *Renewal Results* page displayed html tags.	Hover text on the *Renewal Results* page displays the hover text without any html tags.	Renewal Results
22796	Defect Fix	The hover view text of the "Ver **codigo de accesso**" button on the Spanish screen of *Search Results* pages displayed in English.	The hover view text of the "Ver **codigo de accesso**" button on the Spanish screen of *Search Results* pages displays in Spanish.	Search Results
22428	Defect Fix	The *Transaction history* page displayed "**Changes to current coverage**" as "**individual.health CareInfo.enrolledInPlan.value**" when changes were made.	The *Transaction history* page displays the correct text, "**Changes to current coverage,**" when changes are made.	Transaction History
Data Warehouse				
17137	Defect Fix	End users had to pull in a metric for all queries to ensure that the right data was being presented in the subject area.	Users will no longer need to pull a metric; each subject area will only pull back data for that subject area because of the implementation of the implicit fact	NA
20837	Defect Fix	Individual records were not appearing in the Submitted Individual SA, or Individual Attributes folder across other SAs, because they were inserted into our error table and not the target table. Impacts: Submitted Individual SA - Entire Record Missing Application SA - Individual Attributes Enrollee SA - Individual Attributes Enrollment SA - Individual Attributes	These records should now appear in the Submitted Individual SA and Individual attributes folders across other SAs. This will also reduce the discrepancy percentages in the impacted areas listed above.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
20910	Defect Fix	The effective dating (the begin date of the record, the end date of the record, and the current flag of the record) were not always behaving properly for the Application Subject Area, and the Application Attribute Dimension. **Impacted Attribute:** BGN_DT, END_DT, and DM_CURRENT_RCRD_FLAG in DM_APP_F and DM_APP_D **Impacted Subject Area:** Delegation, Assister, Enrollee, Submitted Individual, Enrollment and Application SA	The effective dating (the begin date of the record, the end date of the record, and the current flag of the record) will have accurate reporting for the Application Subject Area, and the Application Attribute Dimension.	NA
20951	Defect Fix	Inaccurate reporting for the applying for coverage flag at the individual dimension level. **Impacted Attribute:** Applying for Coverage Flag in Individual folder. **Impacted Subject Area:** Enrollee, Submitted INDV, Enrollment, and Application.	Accurate data for reporting for the applying for coverage flag in the individual attributes folder in all SAs with individual attributes.	NA
21285	Defect Fix	Previously, there existed inaccurate or missing individual attributes across all of the Submitted Individual SAs. **Impacted Attribute:** Individual Attributes in the Submitted Individual Attribute folder.	The change should produce more accurate data within individual attributes across the Submitted Individual SAs.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
		Impacted Subject Area: Submitted Individual		
21442	Defect Fix	Medi-Cal Eligibility Program records possessed six types (three of which were misnamed duplicates of the other three). Without the workaround filter used (because of the similarity in names), this could have caused inaccurate reporting in missing many Medi-Cal eligible records.

Impacted Attribute: Eligibility-Medi-Cal attribute in Eligibility Attribute folder.

Impacted Subject Area : Enrollee, Submitted Indv, Enrollment | The Medi-Cal Eligibility Program Attribute in the Eligibility Attribute is now accurate in the Enrollee, Submitted Individual, and Enrollment SAs. | NA |
| 22029 | Defect Fix | The logic that populated the begin dates for records was incorrect, resulting in inaccurate record begin dates for all tables with history. A major impact of this was missing records in the Submitted Individual SA because the logic that populated the begin dates for records was incorrect.

Impacted Attribute: Begin Date in the following Attribute folders: Application, Assister, Demographic, Enrollee, Enrollment, Individual

Impacted Subject Area: | Valid begin dates in the impacted Attribute folders and SAs listed above. | NA |

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
		Begin Date in the following SAs: Application, Enrollee, Enrollment, Submitted Individual		
22107	Defect Fix	Certain attributes in the Application Attributes folder and Application SA were not always populated when they could be. The list of attributes is AHBX_APP_ID, SRC_INDV_CASE_ID, SRC_INDV_APP_ID,

Impacted Attribute : AHBX_APP_ID,SRC_INDV_C ASE_ID,SRC_INDV_CASE_ID in DM_APP_D and DM_APP_F table

Impacted Subject Area: Delegation, Assister, Enrollee, Enrollment, Application, Submitted Indv | The Application Attributes AHBX_APP_ID, SRC_INDV_CASE_ID, SRC_INDV_APP_ID should be populated more often in the Application Attributes folder in all SAs. | NA |
| 22337 | Defect Fix | Address information was missing or outdated in all SAs because of this source issue.

Impacted attribute: Address attributes in Individual Attribute folder

Impacted Subject Area: Enrollee, Submitted Indv, Enrollment, Application | After this change, individual address information should be more accurate within all SAs. | NA |
| 22487 | Defect Fix | The 2 tables (both pending and submitted application information is stored in two different tables in the staging [DW Layer] of the Data Warehouse) did not point to their counterpart of the same application. | The 2 tables (both pending and submitted application information is stored in two different tables in the staging [DW Layer] of the Data Warehouse) point to the correct counterpart of the same application. | NA |

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
22488	Defect Fix	The application record populated in DW_PEND_APP_ID table was not visible in the Application Attributes folder across Subject Areas.	The application record populated in DW_PEND_APP_ID table is visible in the Application Attributes folder across Subject Areas.	NA
22665	Defect Fix	The "No of Applying Individuals" in Case and "No of Individuals" in Case attributes were often null for reporting within the Application Subject Area.	The "No of Applying Individuals" in Case and "No of Individuals" in Case attributes are accurate for reporting within the Application Subject Area.	NA
23211	Defect Fix	Renewal information in the application attributes was missing in all Subject Areas for renewal years that were not the most recent.	Renewal information in the application attributes is present for all previous years for all Subject Areas.	NA
23549	Defect Fix	The records in the Submitted Individual SA and Application SA were missing or outdated because this individual information was not properly associated. **Impacted attribute:** All attributes in Individual Dimension **Impacted Subject Area:** Submitted Individual, Application, Enrollee, Enrollment	This fix will reduce missing or outdated information in all SAs for Individual Attributes.	NA
24161	Defect Fix	Data for the Discrepancy Report in OBIEE was inaccurate, which made it more difficult for end users to accurately assess the accuracy of reporting in the Data Warehouse. Impacted attribute: NA Impacted Subject Area: NA	This fix remedies the inaccurate detailed counts within each SA.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
24424	Defect Fix	The design of error reprocessing found error records and inserted them into the target table for records from the previous day's load. This caused missing associations in all SAs. **Impacted attribute:** Referential integrity in DW tables **Impacted Subject Area:** Delegation, Assister, Enrollee, Submitted Indv, Enrollment, Application	The new design processes these records during the same day so that records in the DW (staging layer) of the Data Warehouse are properly associated and do not cause missing associations in the SAs. For example, this defect could cause missing individual attributes in all SAs (Submitted Individual, Enrollee, Enrollment, etc.). It could cause missing attribute folders in all SAs.	NA
24443	Defect Fix	The following attributes were not always populated when they should have been in the Eligibility Attributes folder in all SAs with eligibility: CASE_ELIG_COMPSTN, HH_COMPSTN, ELIG_PGM, ELIG_PGM_COV_CA, ELIG_PGM_MEDI_CAL Impacted attribute: CASE_ELIG_COMPSTN, HH_COMPSTN, ELIG_PGM, ELIG_PGM_COV_CA, ELIG_PGM_MEDI_CAL in Eligibility Folders Impacted Subject Area: Submitted Individual, Enrollee	The change significantly decreases the number of null values for these attributes (CASE_ELIG_COMPSTN, HH_COMPSTN, ELIG_PGM, ELIG_PGM_COV_CA, ELIG_PGM_MEDI_CAL) in the Eligibility Attributes folders in Enrollee and Submitted Individual SA.	NA
24730	Defect Fix	Changes made to enrollment records in GI (source) were NOT reflecting in the DW.	This change should properly populate information within the Enrollment SA and not cause error records. After	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
			this change, the Enrollment Attribute folder in all SAs should be up to date/have accurate information.	
24963	Defect Fix	The Truven report was populating blank values for the following fields: **COVERAGE_INDICATOR_DENTAL** **COVERAGE_INDICATOR_DRUG** **COVERAGE_INDICATOR_HEARING** **COVERAGE_INDICATOR_MEDICAL** **COVERAGE_INDICATOR_MHSA** **COVERAGE_INDICATOR_VISION** **MEDICAL_FULLY_INSURED_IND** **DRUG_FULLY_INSURED_IND**	The Truven report is populating the appropriate hard-coded values for the following fields: **COVERAGE_INDICATOR_DENTAL** **COVERAGE_INDICATOR_DRUG** **COVERAGE_INDICATOR_HEARING** **COVERAGE_INDICATOR_MEDICAL** **COVERAGE_INDICATOR_MHSA** **COVERAGE_INDICATOR_VISION** **MEDICAL_FULLY_INSURED_IND** **DRUG_FULLY_INSURED_IND**	NA
24986	Defect Fix	The Coverage Year data element of Truven file populated a value of "-1".	The Coverage Year data element of Truven file populates the appropriate values.	NA
25023	Defect Fix	When using Prev and Next Year Enrollee Folders in OBIEE, records without Previous/Next Year information were dropped. This is because the default (dummy) record did not exist. Impacted attribute Folder Previous Year Enrollee Next Year Enrollee Previous Year Enrollment Next Year Enrollment	When using Prev and Next Year Enrollee Folders in an OBIEE report if a record has no previous/next year information the record is still returned, and the default (dummy) values for previous/next year information are displayed (e.g. UNSPECIFIED).	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
		Impacted Subject Area: Enrollee SA Enrollment SA Submitted Individual SA		
25079	Defect Fix	Improvement of ETL performance for the DW_APP_DELGTN and DM_DELGTN_F mappings.	The improved performance of daily load completion of DW_APP_DELGTN and DM_DELGTN_F mappings.	NA
25089	Defect Fix	The view of Assistance SA caused double counting issue and error records because the dropdown selected in LKM was LKM SQL to ORACLE_PERF **Impacted Attribute**: NA **Impacted Subject Area**: Enrollee, Application and Submitted Individual SA.	The dropdown in LKM is changed to LKM SQL to ORACLE_CUSTM_PERF, thereby resolving the double counting issue and updating records accurately in Assistance SA.	NA
25091	Defect Fix	There were multiple current flagged and subscriber flagged records in DW_ENRLEE and affected DM_ENRLEE_F as well because of multiple SUBSCRIBER_INDV_WIDs for the same AK. This caused missing records and did not provide correct information for the impacted SAs to users. **Impacted Attribute:** SUBSCRIBER_INDV_WID in ENROLLEE folder **Impacted Subject Area:** Enrollee, Enrollment and Submitted Individual	The script has been fixed which provides up to date information for impacted SAs.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
25137	Defect Fix	DW_ENRLEE.FIRST_PLAN_SELECT_YR_FLAG had 1.5K current flagged records that have multiple yes flagged records and 50K that have zero yes flagged records causing inaccurate reporting in First Plan Selection of the Year Flag for impacted SAs. **Impacted Attribute:** FIRST_PLAN_SELECT_YR_FLAG in ENROLLEE folder **Impacted Subject Area:** Enrollee, Submitted Individual	The data type is altered in a reusable mapping to properly populate the first plan selection of year flag, thereby providing accurate reporting in First Plan Selection of the Year Flag for impacted SAs.	NA
25138	Defect Fix	The Obsolete flag in Enrollment Attribute folder in Enrollee, Enrollment, and Submitted Individual SA had inaccurate reporting, and had missing or outdated previous and next year enrollment information in the Enrollment SA.	The Obsolete flag in Enrollment Attribute folder in Enrollee, Enrollment, and Submitted Individual SA has accurate reporting with previous and next year enrollment information available in Enrollment SA.	NA
25144	Defect Fix	DW_ENRLMNT.FIRST_PLAN_SELECT_FLAG had 200K cases with 400K current flagged records that have multiple yes flagged records and 9 that have zero yes flagged records causing inaccurate reporting in First Plan Selection Ever Flag for impacted SAs. **Impacted Attribute:** First Plan Selection of the Year Flag in the Enrollment Folder	Data fix has been applied for the records, thereby providing correct information in First Plan Selection Ever Flag for impacted SAs.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
		Impacted Subject Area: Enrollee, Enrollment, and Submitted Individual		
25245	Defect Fix	The effective dating of DW_APP (record begin date and end date) is inaccurate. This results in inaccurate begin and end dates in the Application SA, as well as error (missing) records in the Submitted Individual SA.

Impacted attribute: Begin Date and End Date in DW_APP and Application SA

Impacted Subject Area: Application SA Submitted Individual SA | No more error (missing) records in Submitted Indv SA due to this issue. The effective dating of DW_APP was corrected, and as a result the effective dating of the Application SA is corrected as well, and records will no longer error out (missing) from the Submitted Individual SA due to this issue. | NA |
25288	Defect Fix	The MAGI and subsidy household size fields were not populated in source, so we hid them in the RPD.	The MAGI and subsidy household size fields are now being populated, but still will not be populated for older records.	NA
25336	Defect Fix	The historical view of Delegation SA displayed multiple records for the same case for the same date.	The historical view of Delegation SA displays the correct records.	NA
25430	Defect Fix	There were Multiple Current Flagged Records in DW_APP. This impacted error records in the application information resulting in missing records in the Application SA and outdated or missing application attributes in all SAs.	The records in Application SA are up to date.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
25474	Defect Fix	A data discrepancy issue in the Submitted Individual SA displayed 470,000 records without current flags and 761,000 records had multiple current flags.	All of these records now appear with current flags as per design.	NA
25535	Defect Fix	The missing Enrollment CA change logs in the enrollee mapping had inaccurate reporting in the Enrollee SA.	The fix in the missing Enrollment CA change logs in enrollee mapping now provides accurate reporting in the Enrollee SA.	NA
25783	Defect Fix	The following SAs had missing records • Application • Assister • Submitted Individual SRC_ADMIN_ID, SRC_ENTITY_ID, SRC_ASSISTER_ID, and SRC_BROKERS_ID are = 0 in certain records in DW_ASSISTER. Count of each below: COLUMN COUNT of 0 SRC_ADMIN_ID 712 SRC_ENTITY_ID 10,186 SRC_ASSISTER_ID 10,898 SRC_BROKERS_ID 10,898	The following SAs have up to date information • Application • Assister • Submitted Individual	NA
26363	Defect Fix	The ETL for DM_SUBMIT_INDV_F is experience performance issue.	The ETL for DM_SUBMIT_INDV_F has been split into two parts, in order to improve performance of the ETL and improved performance of daily load completion.	NA
26364	Defect Fix	The determination date and time were not provided and displayed in the Submit Individual SA.	The determination date and time are now populated and displayed in the Submit Individual SA	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
26383	Defect Fix	The Delegation SA was not part of Discrepancy report.	The Delegation SA is added to Discrepancy Report and appropriate metrics are displayed for the report.	NA
26395	Defect Fix	The delegation attributes were not present in the SA Processing Dashboard.	The delegation attributes are present in the SA Processing Dashboard.	NA
26561	Defect Fix	One of the mappings (DW_CODE) was dropping a staging table. Per our design/requirements staging tables should be truncated and reloaded, not dropped and re-created.	The staging table (C$ table for DW_CODE) is now truncated and reloaded and not dropped by the ETL.	NA
26598	Defect Fix	The CEC ID data element was not populated in current delegates for the Delegate at Plan Selection attribute.	The CEC ID data element is populated in current delegates for the Delegate at Plan Selection attribute.	NA
20944	Defect Fix	The effective dating (the end date of the record, and the current flag of the record) was not always behaving properly for the Application Subject Area because of HBX SAWS data issues.	The effective dating (the begin date of the record, the end date of the record, and the current flag of the record) will have accurate reporting for the Application Subject Area in regards to HBX SAWS data.	NA
22483	Defect Fix	The Submitted Individual Subject Area has records that are soft-deleted, and are not shown in the front end because they are no longer valid. Currently the logic to populate this flag is based solely on if the eligibility record is soft deleted in source. However, for a specific case (when the source system changes the effective dates of an eligibility record) the records in the submitted	The fix for this defect will update the logic for the soft deletion flag in submitted individual subject area to also include the scenario mentioned above.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
		individual subject area can become invalid. **Impacted attribute:** IS_DELETED_FLAG in Submit Indv folder **Impacted Subject Area:** Submitted INDV		
23246	Defect Fix	There is no impact on current functionality for the reported duplicate code values as these duplicate codes are not used. **Impacted attribute:** code values in DW_CODE table **Impacted Subject Area:** NA	The fix for the reported duplicate code has no impact on current functionality.	NA
24445	Defect Fix	Missing enrollment types in Enrollee did not provide correct information in terms of the Enrollee Subject Areas. ENRLMNT_TYPE comprised of 2,079,329 null values out of a total of 3,755,457 values in the Data Warehouse. This was the case when the Current Flag was active and the ROW_WID was a value other than "-1" (i.e. dissociation) in the Enrollee Fact table. Impacted attribute: Enrollment Type attribute in Enrollment folder	Populating enrollment types in Enrollee provides proper information in terms of the Enrollee Subject Areas.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
		Impacted Subject Area: Enrollee		
24760	Defect Fix	Logic within the enrollment SA was invalid, causing missing enrollee records and information. The logic for DM_ENRLMNT_F included a join to the DW_ENRLEE table. This join needed to be a left join instead of a join as it caused records to drop if the join conditions were not met, which can happen. Impacted attribute: NA Impacted Subject Area: NA	Referential integrity issues are resolved for enrollee records and information missing in enrollment.	NA
24956	Defect Fix	In the delegation SA for some records some Application Attributes were missing (those sourced from DW_PEND_APP). **Impacted attribute:** Application attributes were missing from Delegation SA **Impacted Subject Area:** Delegation	The data for the application attributes is populated and displayed in the Delegation subject area	NA
24972	Defect Fix	The FIRST_PLAN_SELECT_FLAG attribute name was displayed in the Enrollment subject area. **Impacted attribute:** FIRST_PLAN_SELECT_FLAG	The attribute name FIRST_PLAN_SELECT_FLAG is renamed to FIRST_PLAN_SELECT_EVER _FLAG and is displayed in the Enrollment subject area.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
		in Enrollment Folder **Impacted Subject Area:** Enrollment		
24984	Defect Fix	There is no impact in the existing business functionality. Extending demographic dimension with the source keys is for better maintenance purpose. Impacted attribute: SRC_INDV_CASE_IS in DM_DMGRPHC_D table Impacted Subject Area: NA	There is no impact in the existing business functionality. The fix for extending demographic dimension with the source keys provides better maintenance in ETL.	NA
25007	Defect Fix	There is no impact in the existing business functionality. This defect is for the better maintenance. Impacted attribute: variables VAR_DW_ENRLEE_ADDR_RESIDENCE_CODE & VAR_DW_ENRLEE_ADDR_MAILING_CODE in DW_ENRLEE Mapping Impacted Subject Area: NA	There is no impact in the existing business functionality. The fix for defect provides better ETL code maintenance.	NA
25139	Defect Fix	The issue with the first plan selection flag resulted in inaccurate reporting in the Enrollee SA subject area. DW_ENRLEE.FIRST_PLAN_SELECT_EVER_FLAG there were ~650 individuals with ~1.6K current flagged records that had multiple yes flagged records, and	The fix for this issue corrects information in terms of first plan selection flag in the Enrollee SA subject area.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
		˜50K that had zero yes flagged records. Impacted attribute: FIRST_PLAN_SELECT_YR_FLAG in ENROLLEE folder Impacted Subject Area: Enrollee		
25141	Defect Fix	A discrepancy in the Obsolete Flag in the Enrollment attribute resulted in inaccurate reporting using the Obsolete Flag in the Enrollment Attribute Folder in the Enrollee, Enrollment, and Submitted Individual SA. This also resulted in missing outdated previous and next year enrollment information in the Enrollment SA. In DW_ENRLMNT, there are ˜50K cases with ˜108K current flagged records that have multiple non-obsoleted flagged records, and ˜130 that have zero non-obsolete flagged records. Impacted attribute: Obsolete Flag in the Enrollment Attribute Folder Impacted Subject Area: Enrollee, Enrollment, and Submitted Individual	The fix for the discrepancy in obsolete flag in the Enrollment attribute provides correct reporting in the Enrollment, Enrollee, and Submitted Individual subject area. The previous and next year enrollment information is available in the Enrollment SA.	NA
25142	Defect Fix	An issue with the first plan selection flag resulted in inaccurate reporting in the Enrollee SA subject area.	The fix for this issue provides correct information in terms of first plan selection flag in	NA

		Submitted Individual		
25331	Defect Fix	Due to a configuration issue there were multiple current flagged records in DW_ENRLMNT. This resulted in error (missing) records in DW_ENRLEE, missing records in the Enrollee SA, double-counting in the Enrollment SA, and missing Enrollee Attributes in other SAs.

In DW_ENLRMNT, there were about 455K cases that had multiple current flagged records per SRC_ENRLMNT_ID. This had downstream effects on DW_ENRLEE and caused about 34K records in the error table.

Impacted attribute:
Current flag attribute in Enrollment SA
Enrollee Attribute Folder in all SAs

Impacted Subject Area:
Enrollee, Submitted Individual, Enrollment | There is only one current flagged record in DW_ENRLMNT. As a result, there are no missing records in Enrollee SA, double counting in Enrollment SA, or missing Enrollee folder attributes in other SAs due to this issue. | NA |
| 25334 | Defect Fix | Due to a configuration issue there were multiple current flagged records in DW_ADDR. This resulted in error (missing) records in DW_ENRLEE, missing records in the Enrollee SA, missing Individual Folder attributes in all SAs, and | There is only one current flagged record in DW_ADDR. As a result, there are no missing records in Enrollee SA, double counting in Enrollment SA, missing Individual Attributes folder in all SAs, or missing | NA |

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
		missing Enrollee folder attributes in all other SAs. In DW_ADDR, there were 37K individuals with multiple current flagged records. This had downstream effects on DW_ENRLEE among other tables. Impacted attribute: Individual Attribute folder in all SAs Enrollee Attribute Folder in all SAs Impacted Subject Area: Enrollee, Submitted Individual, Enrollment, Application	Enrollee folder attributes in all SAs due to this issue.	
25432	Defect Fix	There were missing records in the Application SA, and outdated or missing application attributes in all SAs. In DW_PEND_APP, there were 40K individuals with multiple current flagged records. This had downstream effects on DW_ENRLMNT among other tables Impacted attribute: Current flag attribute in Application Folder Impacted Subject Area: Delegation, Assister, Enrollee, Submitted Individual, Enrollment, Application	The fix for the missing records Application SA provides up to date information for impacted subject's areas.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
25433	Defect Fix	There were missing Records in Enrollee SA, Submitted Individual SA. In DW_ENRLMNT, there were 980K individuals with multiple current flagged records Impacted attribute: Current flag attribute in Enrollment Folder Impacted Subject Area: Enrollee, Submitted Individual	The fix for the missing records Enrollee SA, Submitted Individual SA provides up-to-date information for impacted subject areas.	NA
25461	Defect Fix	The root cause of the multiple current flagged records and time span issue the root cause was identified as the next delegation record not being a part of the incremental extraction filter. As a result when a new delegation was accepted, the previous delegation was not automatically brought into the Data Warehouse and updated, resulting in multiple current flagged records and time span issue. Impacted attribute: Current flag attribute in Delegation Folder Impacted Subject Area: Submitted Individual, Application	This has been resolved by the code change made to incremental extraction filter.	NA

Ref ID	Type	Previous Design/Problem	Updated/Resolved Functionality In this Release	Pages Impacted
25462	Defect Fix	There were missing Records in Submitted INDV SA and did not provide correct information for the impacted subject areas to users. In DW_ELIG, there were 753K IDs with no current record and 484K IDs with multiple current records. See SQL script and special logic for DW_ELIG current record determination Impacted attribute: Current Flag attribute in DW_ELIG table Impacted Subject Area: Submitted Individual	The fix for the missing records in SUBMITTED INDV SA provides up-to-date information for impacted subject areas.	NA
25463	Defect Fix	There were missing Records in Submitted Indv. In DW_DMGRPHC, there were 96K individuals with time span overlap issue Impacted attribute: DW_BGN_DT,DW_END_DT in DW_DMGRPHC table Impacted Subject Area: Submitted Individual	The fix for the missing records Submitted Indv provides up-to-date information for impacted subject areas.	NA
25465	Defect Fix	The attributes begin date and end dates were inaccurate in DW_ENRLEE and in the Enrollee SA. This defect caused error (missing) records in the Submitted INDV SA. In DW_ENRLEE, there were 7K individuals with time	The attributes begin date and end date in the Enrollee SA are accurate. Also there are no missing records in the SUBMITTED INDV SA caused by this issue.	NA

Alternate Procedures

Summary of Alternate Procedures

This section summarizes Alternate Procedures **No Longer in Effect** as of this release. Except for the following (and those noted in previous release notes), all other Alternate Procedures from previous releases remain in effect.

#	Alternate Procedures No Longer in Effect	Ref ID	Release Delivered
Enrollment Assistance			
181	When a user clicks on the Continue button for renewals on the Individual homepage, the Plan Selection – One Plan for All page displays instead of the Custom Grouping page which would allow the pending group from 2015 to enroll.	24499	16.2
183	Household Enrollment Introduction page displays Choose Health Plan button instead of Continue Health Plan Update button.	24638	16.2
Individual Portal			
153	Eligibility Changes to MAGI Medi-Cal for Household Member After RAC to Update the Home/Residence Address	20552	16.2
167	"We Apologize" Error Message Displays When Navigating to the Household Introduction page	22175	16.2
174	"We Apologize" Error Message Displays When Users Attempt to View Application PDF link.	23054	16.2
180	A "We apologize" error message displays after clicking on the View Case button on the Search Individual page.	23582	16.2
185	When a user/admin attempts to submit an application, a "We Apologize" error message is displayed upon clicking Submit button on the Application Signature page. This issue occurs when the page is idle for more than 2minutes. When a page is idle for more than the specified time, connection between the application and database is lost, timing out the session.	24701	16.2
187	When a user/admin clicks on continue report a change link on the individual home Page, a "We Apologize" error message is displayed.	24825	16.2

This section summarizes the **NEW** Alternate Procedures for known issues agreed to be resolved in a future release.

#	New Alternate Procedures	Ref ID	Planned Release
Admin Portal			
191	Admin user enters and saves Note in the Flexible App but the note does not transfer over to display in the Case Summary 'Notes' section	26702	16.4

Detailed Alternate Procedures

The following provides detailed alternate procedures for known issues:

Alternate Procedure #191 – Admin user enters and saves Note in the Flexible App but the note does not transfer over to display in the Case Summary 'Notes' section	
Users Impacted	Admin users (Service Center Representatives and County Eligibility Workers)
Area Impacted	Admin Portal
What's Happening Now	Admin user adds notes to Flex App. In-Progress Flex App: 1. Admin user types notes into the **Notes** textbox field on the Flex App. 2. Admin user clicks **Save**. Typed note is saved and displays in a non-editable section just above the Notes textbox field on the Flex App. Admin user should not look for the Notes entered in the Flex App to display on the *Summary - Notes* page. Submitted Flex App: 1. Admin user types notes into the **Notes** textbox field on the Flex App. 2. Admin user clicks **Save**. Typed note is saved and displays in a non-editable section just above the Notes textbox field on the Flex App. 3. Admin user submits completed application and case number is assigned. 4. After searching by case number, Admin user navigates to *Summary - Notes* page for submitted Flex App. Notes entered in the Flex App do not display in the *Summary - Notes* page for the submitted case.

Alternate Procedure #191 – Admin user enters and saves Note in the Flexible App but the note does not transfer over to display in the Case Summary 'Notes' section	
Actions to Take	1. Before submitting a Flex App that contains notes, copy and paste the typed note(s) from the Flex App into a sticky note or Word document. 2. After submitting the completed Flex App for eligibility results, also copy the case number from the left navigation panel. 3. Navigate to the **Search Individual** page. 4. Select Search by: **Case ID** from the search dropdown and paste in the case number. 5. Click the **Search** button. 6. From the *Results*, select the corresponding individual's radio button. 7. Click the **View Case** button. User is navigated to the *Application History* page. 8. Click on the **Notes** from the left hand Summary navigation panel. 9. Click **Add Note** button. Copy and paste in the note saved to the sticky note or Word document into the Notes field. 10. Click **Save Note** button. Copied and saved note displays in the non-editable Notes section above the Notes textbox on the *Summary – Notes* page.
